TELEGRAPHIC

Reston Wool.

The Canada Pacific.

Montres. 24.—Cablegrams across the complete success of the Came Partitle scheme in London, but rome are circulated here to-day that the contined unitarino of American Partitle roads has been used to prevent the commission of the Canadian project.

Water Scarce.

Bealing, Pa., 25.—The city is aims a without water, nun flows shat of sevent street; the railroad shops and several manufacturing establishments are compelled to stop work. Citizens dependupen pumps and springs for water for domastic use. The distributing reservoir is entirely emptied, and a scart supriy in the storage reservoir is reserved for tree in case of fire.

South Carolina's Censos New York, 25.—Bepublican papers are a ill making the most of apparent frauds in South gCarolina's census. The latest figures published this morning show that her population for fifty year-from 1829 to 1870, increased 202 859, and for five years, from 70 to 75, increased 218,000. It is now charged that her population at the last date was packed, with the design te increase her political power, and that it has been done again.

For Buch Revenue.

Chies 20, 25.—Journal's Washington:
The treasury receipts average over \$1,000.000 daily. The general opinion here
among government efficials is that unless the debt is to be paid off at a rapid
rate Congress will be justified in making
large reductions in taxation. Secretary
Sherman favors paying the debt rapidly
and thus getting it out of the way and
relieving the people from interest burdens. The new census will give reasonably accurate information as to where the
bulk of the national debt is had.

The Chinese Vessel.

The Chinese Vessel.

Washington, 25.—The true reason why the proposed proclamation admitting Chinese ressels to American ports on an equal footing with those of the most tayored nations, has not been issued, is encouraging. The views presented in the San Francisco Bulletin of the 12th, showing the meaning of this new phase of the Chinese invasion, has startled the President, who is indisposed to do anything, not clearly required by law, which shall directly or indirectly encourage slavery or bondage in any form. There are grave differences of opinion has as to whether the existing law justices the preclamation.

Political Points.

San Francisco, 25.-A Phoenix, Ari conventien nominated M. W. Stewart for delegate to Congress.

New York, 25. Herotid's Washington special: Gen. Sherman says the latters which he wrote to Hancock in 1870, and to which Hancock replied at length, are to be published in a new biography of the general, in connection with the letter aircady published.

Appleton & Co. will publish, to-morrow, the compiste Hancock-Sherman correspondence of 1876 and 1877, and sn authorized biography of Hancock.

Charleston, 25.—D. Wyatt Aiken and George D. Tillinan were renominated for Congress in the Third and Fifth Districts by democrats.

The Democratic Quarrel in New York.

New York, 25 .- The Herald again rebukes the egregious mismansgement of the domocratic canvass in New York. It says a union of the two factions is more doubtful than it was when the Circinnati doubtful than it was went too Citemany mill accept nothing less than full recognition of its regularity in the context for city patronage in the next municipal election. Thilden democrats find themselves "between the devil and deep sea." If they give in to the cisims of Tammany they virtually sorrender the city patronage to the Tammany faction; if they resist the claims of Tammany they give the state to Garfield, and will be held reponsible for his election. They will be forced to surrender and the consequent triumph of Tammany will make them comparatively indifferent to the success of the national ticket. The New York fould may yet be besled, but it would have been worth thousands of votes to close it immediately after Hansock's nomination. It is not yet certain it will be healed at all, and if it remains open Garfield will be the next president.

Aighanistan. London, 25.—An India dispatch says:
A large number of Ghazis are flocking
flown from Khelati, Ghizzai, Rond and
suber directions, to Join Ayoob Rhan,
who could now retreat if he wished, as
the Ghazis are determined to fight to the
the Ghazis are determined to fight to the

Candabar, 25.—The enemy is making no attempts at a regular singe.

St. Petersburg, 25.—The Indian Prince Ramichunder, for some time resident at the capitol, and who is related to the notorious Nana Sshib, has again appeared as the friend and adviser of Abdurrahman Khan, to meet whom he is, for the second time, on his way to Afghanistan. The suspicious which his former governments in Russia and Afghan-Taristan have croated in the minds of those who believe in the latest raport of Russian intrigues in Afghanistan, will probably only be increased by latest advices about him. Ramichundar intends to go to Teheran on his way to the Ameer's headquarters. He says the Ameer's headquarters. He says the Ameer's headquarters. They are also highly displessed at Gen. Scobeloff's movements against the Turcomans, seeing danger to Horat, which the Shah hopes to annex. Candabar, 25.—The enemy is making

Disastrous Fire.

Philadelphia, 25.—A fire broke out shortly after 4 o'clock this morning, in the flour mill of Wm. B. Thomas & Co. Spreading rapidly, the flames communicated to the stove and hollow ware foundry of Stuart & Peterson, on the west, which extended, as did the mill, from Willow to Hamilton street, and then to a large building occupied by Gumpert & Brothers, manufacturers of cigars Thomas & Co's mill was in operation at the time the fire was disc wered. Wm. Miller, fireman in the milling room, is missing. The building was soon in ruins, all the walls falling and filling the streets by which it is bounded. Failing bricks crushed the eastern end of Stuart & Peterson's foundry, and the flames, which seen swept into the pattern coun, in the northeast corner of the structure, destroyed nearly all the patterns, which Peterson stated will be difficult to replace, and be estimates his loss at \$75,000, which is covered by insurance. The loss on the mill property is placed at \$100,000. Gumpert & Brother occupied the second and third floors of part of the building at the northwest corner of Thirteenth and Hamilton street, and the second, third and fearth floors in the rear. The firm employed 150 hands, and they had in stock 400,000 looss cigars. Insurance, \$23,000.

AN IMPORTANT TEST.

The following interesting and important item is taken from the Southern Utah Times:

Mr. A. Byram, now of Caiosgo, and one of the tirm of Campbell Culten & Co., a gentleman well versed in the science of chemistry, has just completed a very success a experiment in the smelting of the ore from the Horn Silver Mine. From he presence in the ore of such base as antimony, sulphur and arsenio, it was deemed very necessary to use a large perce tage of iron ore as flux also to resalt the ore in the open air so as to volatilize, as much as possible, the obnexious bases before put-ting r through the farmace. Also this was very costly, iron ore being As non-se se can find o the coarge for the furnace, befor Mr. Byram made his test, was a

totiows: Four barro s of roasted ore one barrow of rich or raw ore, on barrow of lime, five barrows of iron rs and one n-if barrow of matt.

The average cost of smelting on on of one was from \$25 to \$27. Mr Byram claimed that the ore could be run much cheaper. He said that the expense of rossting, the expense of iren ore and of lime could be avoided, and thereupon commenced his ex-periment. Although many were in-credulous as to his making a success. credulous as to his making a success, he went bravely to work and was to be found around the furnace day and night. A nine days' run proved him to be successful. After an examination of the accounts, it was found that he had saved over 80 per cent, of both the lead and silver; that he had used less coal and lime and but very little iron, and that it had coal very little iron, and that it had con the company but \$15 per ton to run the ore through. His charge is re-ported to be as follows: Three barrows of reasted ore, two barrows of raw ore, three barrows of matt, and a small amount of iron. The matt

was roasted, but Mr. B. claims that it will flux the ore just as well before being reasted as after.

The most important features in this experiment are the saving of the excense of using wood for rosating and ron for fluxing. About 400 cords o oedar wood were used on an average oer month for the purpose of reasting the ore and matt. That slove smounts to \$1,000 per month; then he salvage in the non use of iron ore As a proof of Mr. Byram's success oth furnaces are now being run ac ording to his idea.

READ RECORD

FOR THE LAST ELEVEN MONTHS.

We have sold RIGHTY WAGONS since September, 1879, and out of the Entire Lot

Not One Tire has been Loose, Not One Hub Band has been Loose, Not One Spoke has been Loose, Not One Thimble has been Loose,

WEIR PLOWS AND HARROWS.

Not One Wheel has Failed, Only One Axle Broke-That at Silver Reef-Circumstances Unknown. Only One Tongue Broke - That Caused by a Runaway,

We are free to admit that the NEWTON WAGON COMPANT, in the year 1878, under-estimated the severity of our country and climate on wagons and sent us some defective material. We are just as bonest in believing that the wagons we have received in the years 1879 and 1880 are the best that have ever been sold in Utah of any one make.

Our repairs for the last Elsven Months have consisted in Stay Chains, Single-trees, Clerises. Scat Hooks, Bolts, Etc., and have not cost us more than \$5.

Every Wagon is Warranted, both by the manufacturer and the agent, for One Year. The purchaser is authorized to have Repairs Made at Our Expense, should the material or workmanship prove faulty.

We keep a Full Stock of Farm and Freight Wagons and Wagon Material.

287 Before Purchasing a Wagon, do not fail to See the NEW TON.
